GuardMyCode free assessment

Client: Example Co

Date: 2026-10-16 19:58 UTC

Projects reviewed: tienda-en-linea

1. Summary for the owner

F

RISK GRADE

Customer data open to the public

5	9	4	2
Critical	High	Medium	Low

Grade before fixes. A: no serious issues. B: only medium issues. C: high-risk issues open. D: critical issues open. F: customer data open to the public.

Files with problems: 11

Most urgent problems:

1. **Firebase rules allow anyone access (if true)** (critical, same day)
2. **AWS access key** (critical, same day)
3. **Database URL with password** (critical, same day)
4. **Stripe live secret key** (critical, same day)
5. **Supabase service_role key (full database access)** (critical, same day)

2. Inventory

Project	Files	Languages	AI tools and platforms detected	People who committed	Commits	Last change	Commits marked as written with AI	Where the code is hosted
tienda-en-linea	10	Python, JavaScript, TypeScript, SQL	Claude Code, Supabase, Firebase	1	3	2026-10-16	Claude 1	—

3. What we found

Problems by area. The exact location of each one is in the full report.

Area	What it covers	Critical	High	Medium	Low	Files
Secrets	Passwords, API keys and tokens written in the code or its history.	4	3	—	—	5
Outside exposure	Data or databases that someone outside the company could reach.	1	3	—	—	3
AI tool settings	AI coding tools set up with too much access.	—	2	2	1	3

Area	What it covers	Critical	High	Medium	Low	Files
Code flaws	Code patterns that open the door to attacks or turn security checks off.	—	1	2	—	1
Dependencies	Libraries with published security flaws or no locked versions.	—	—	—	1	1

4. What the full report adds

- The exact file and line of every problem, with the exposed key masked.
- What could happen with each one and how to confirm it.
- A step-by-step fix plan, plus ready-made fixes.
- We fix it with you and keep it fixed: blocking new leaked keys and reviewing every change.

To get the full report and the fix, contact us at guardmycode.com. Send us the .zip from this review; it contains only this summary, never your code.

Internet connections

Your code was not sent anywhere. These are all the connections this review made:

- None.

Automated checks find common, known problems; they do not prove a system is secure. Findings marked for review should be confirmed by a person before acting. No secret values are included in this report.
